

**Before leaving
my country, i
believed that...**

I would work in a
restaurant, i would take care of
children, i would go to school

I could trust that
person

I dreamed of a
better life

Life would be
easier in Europe

I would have no
problem in France

My life would
change

I would win a lot of
money to help my family

I would be safe

Since I'm in France...

I have a large debt to repay to those who brought me

I am under control and i have no freedom anymore

I'm a victim of violence

I'm scared, I feel bad, i have nobody to talk to

I must remain silent if not they will kill me or my family will have problems

I'm forced for prostitution everyday

I'm afraid of being arrested and sent back to my country

If you are in this situation than you may be a victim of trafficking. You do not have papers but you have rights in France.

TALK TO US, WE CAN HELP YOU
